DETAILED ACTION

Claim Objections

1. Claim 7 is objected to because of the following informalities: the numeral 10 in claim 7 should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's acknowledged state of the art in view of Rotermund et al. Applicant's arguments have been considered but are not deemed persuasive. Either of the gases disclosed in the secondary reference, argon or cyclopentane, may be considered a blowing agent since they are both well-known in the art as blowing agents; see for example column 14, lines 44-56 of Rotter et al 5,288,764 which refers to both argon and cyclopentane as blowing agents. Therefore, the reference's preferred ratio of argon and cyclopentane overlaps that of the instant claims. Furthermore, the ratios of gases disclosed in the secondary reference is a preferred range as evidenced by the term "preferably from ..." used in the reference at column 3, lines 53-55. It would have been obvious to one of ordinary skill in the art to adjust the amounts of the two

gases to provide optimum properties for a particular end use of the foam in the absence of unexpected results attributable to the claimed range.

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's acknowledged state of the art in view of Rotermund et al as applied to claims 1-7 and 9-12 above, and further in view of Abouy et al for the reasons of record.

5. Rotter et al 5,288,764 is cited to show the state of the art in blowing agents.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
